PRACTICAL PHOTOGRAPHY CLASS

You have just purchased a new digital camera and are very excited to use it. You start to read the instruction manual only to find out that you do not understand what it is telling you. Wouldn't you appreciate someone with experience to explain photography in a language that you can understand? Now is your opportunity to do just that. John Dykstra has over 30 years experience as a professional photographer, instructor, photo/tour guide and photo competition judge. As digital photography is becoming very popular there is also a need to learn how to create a pleasing photograph. Many new digital photographers want to learn and understand how the camera works and how and what makes an exceptional image. In response to many requests to meet this need John Dykstra is now offering photography classes. In this class, John will cover all the aspects of photography that will help you create excellent photographs on purpose rather than by accident. The classes will be held one evening each week for 4 consecutive weeks from 7:00 PM to 9:00 PM. The starting date will be announced based on number of participants. Classes will be conducted at the Outdoor Discovery Center in Holland with tuition of \$75.00 per person. For more information please contact John Dykstra Photography. To register, please fill out the form below and send it with payment to John Dykstra Photography
